Expertise of GREEN

GREEN is the heart of an ambitious project on neurodegenerative disorders, mainly focusing on 4 diseases : **Alzheimer's disease, Parkinson's disease, Huntington's disease and Multiple Sclerosis.**

The research force of this project is a strong expertise's team from basic to clinical research as well as to innovative technologies and social sciences.

This capability to assemble teams with so diverse and complementary expertise in a single geographical location is unique in France. It favors synergy between strong fundamental researches and pathophysiological approaches and through, the researchers and professionals can meet the expectations of the society on major public health issues within the neurosciences.
